PAINTING INSTRUCTION FOR WALL PANELS

Infinity

Wall panels preparation

In order to properly prepare the panels, wipe them clean before painting from any dirt and dust. The surface of the panels should be clean and degreased. You can use for this a damp microfiber cloth

Spray painting method

The best panel painting effect from the Infinity collection can be obtained by spray painting using acrylic paint. In this case you will get a perfectly smooth surface painted panels. Depending on the selected one or two coats of paint is enough. You can use spray painting method by yourself or with the specialized paint shop, before or after mounting panels on the wall.

Painting with a brush

You can easily paint panels from the Infinity collection alone with wall paint with a brush painting. To paint the panels we recommend using a well-covering wall paint. Apply the first coat of paint with a brush. Then wait for it to dry and apply a second layer. Remember that when you will painting the panels with a brush, the bristle structure will be visible on the surface. You can get a perfectly smooth surface by sprayed painting method.
